OBJECTIVE

A motivated and detail-oriented MERN Stack Developer with a passion for creating efficient and scalable web solutions. Seeking a role where I can apply my technical skills and collaborate with a talented team to deliver high-quality software products.

EXPERIENCE

01/03/2023 -

• Software developer(Mern-stack)

Webenetic pvt ltd

- Developed and maintained full-stack applications using MongoDB, Mysql, Express.js, React, and Node.js.
- Designed and implemented an intuitive and user-friendly admin dashboard for efficient content management.
- Integrated a mysql database to store and retrieve dynamic content, enabling easy updates for website administrators.
- Developed RESTful APIs using Node.js and Express.js, facilitating seamless communication between the frontend and backend.
- Implemented user authentication and authorization to ensure secure access and content control.
- Customized the CMS to meet specific company needs, providing a tailored solution for diverse website requirements.

01/02/2022 - 01/03/2023

Frontend developer

Webenetic pvt ltd

- Led a cross-functional team to revamp the user interface and overall design of the blogging websites, resulting in a modern and visually appealing layout.
- Implemented responsive design principles and optimized the websites for various devices, improving user experience and reducing bounce rates.
- Collaborated closely with SEO specialists to implement on-page optimizations, resulting in a significant boost in organic search traffic.
- Introduced lazy loading techniques and optimized media assets, reducing page load times and enhancing overall website performance.
- Successfully achieved a 25% increase in user engagement, measured through improved session durations and increased page views.
- Improved SEO rankings, with targeted blog posts now ranking higher on search engine results pages (SERPs), leading to increased organic traffic.
- Received positive feedback from users and stakeholders for the enhanced aesthetics and improved usability of the blogging websites.
- Collaborated with the design team to translate mockups into functional web pages.

- Optimized website performance through efficient coding practices.

09/11/2021 - 01/02/2022

Web developer

Webenetic pvt ltd

- Engaged in detailed planning and discussions with teammates, ensuring a clear understanding of project requirements and goals.
- Participated in the entire website development lifecycle, from conceptualization to deployment, fostering a holistic view of the process.
- Worked closely with designers and backend developers to implement responsive and visually appealing user interfaces.
- Gained insights into the intricacies of web technologies, learning how different components come together to create functional and dynamic websites.
- Acquired a deep understanding of web development principles, including HTML, CSS, and JavaScript, through hands-on experience in building diverse websites.
- Explored various web development frameworks and libraries, expanding knowledge in modern technologies and tools.
- Actively engaged in continuous learning and skill development, staying abreast of industry trends and best practices.
- Collaborated with teammates to troubleshoot and resolve issues, fostering a collaborative and supportive team environment.
- Communicated effectively with both technical and non-technical stakeholders, ensuring alignment on project objectives and progress.

EDUCATION

SSC 70.20

SKILLS

- Front-End: React.js, Next.js, Redux, HTML5, CSS3, Bootstrap, Tailwind, JavaScript (ES6+), Responsive Design
- Back-End: Node.js, Express.js, RESTful APIs, Authentication (JWT)
- Database: MongoDB, Mongoose, Mysgl, Seguelize
- · Version Control: Git, GitHub
- Deployment: Heroku, AWS, Netlify, Hosting platforms
- Tools: VS Code, Postman, Insomnia, npm/yarn

PROJECTS

Content Management System (CMS)

Technologies: React.js, Node.js, MySQL, Express.js

Designed and implemented a robust Content Management System (CMS) from the ground up, showcasing proficiency in both frontend and backend development.

Frontend Development:

- Developed an intuitive user interface using React.js providing a seamless content management experience for administrators.
- Implemented responsive design principles, ensuring optimal user experience across various devices.

Backend Development:

- Created RESTful APIs using Node.js and Express.js to facilitate data communication between the frontend and backend components.
- Integrated MySQL database to store and manage dynamic content, optimizing queries for efficient data retrieval.

Next Js Blogging App

- Developed a dynamic and responsive blog application using Next.js
- Showcased proficiency in React.js and server-side rendering
- Implemented features for post creation, editing, and deletion
- Ensured a seamless user experience through efficient data fetching
- Utilized Next.js for optimal performance and SEO
- Demonstrated strong front-end development skills

Netflix Clone

- Implemented a dynamic homepage with responsive movie rows showcasing trending and recommended titles.
- Integrated the TMDb (The Movie Database) API to fetch real-time movie data, including images and details.
- Created a movie trailer playback feature.
- Implemented user authentication.
- -Technology Stack: Frontend: React.js, CSS
- API Integration: TMDb API for fetching movie data
- State Management: Used React Redux for efficient state management
- Deployment: Hosted the app on Netlify for seamless accessibility
